Teaching notes

Two main tasks, 75 minutes. Keep the language visible while students make, rehearse and share.

Print and prepare

先準備實體材料，再依照講義頁碼帶領。

Per student: student-handout.pdf (4 A4 portrait pages; duplex is fine) and the timeline mat (group-mats-and-cards.pdf, p.2, A4 landscape).
Per group of four: the spider mat (p.1), job cards (p.3), skill cards (p.4) and event cards (p.5). Print mats / cards single-sided at 100% / Actual size. The PDF mixes landscape and portrait pages; allow automatic orientation. Cut the dashed rectangles and provide reusable adhesive or let students place cards.
Card sharing: each student chooses five event cards. Use the six blanks to repeat an event or add a personal event; students can also write events directly into their slots.

Teaching sequence

每個主活動都包括語言支援、小組操作及個人分享。

Time	Instruction and scaffold
0-3	Show both outputs: a job explanation and a five-event story.
3-9	Handout p.1: recycle Units 1, 2, 5 and 9; model needs to be / needs to / needs + noun. Students complete three guided items.
9-13	Read the four worker clues on the next page twice. Students note any two on handout p.2; compare evidence.
13-23	Handout p.2 + spider mat: choose four jobs and two skill cards per job. Every student explains a match.
23-28	Challenge one match. Model because and ask about work preferences. Students revise a reason.
28-35	Individual output 1: 2 minutes to prepare; four 45-60-second reports; brief peer feedback.
35-42	Handout p.3: demonstrate earlier / later with two dated events; highlight had + participle and model two patterns.
42-47	Students complete the guided grammar and rehearse a two-event sentence with a partner.
47-55	Handout p.4 + timeline: choose five past events, put them in order and add ages / dates.
55-62	Group discussion: everyone answers a person, place or feeling question and links two pairs of events.
62-68	Prepare the individual story using the frames, then improve a sentence after a partner check.
68-73	Individual output 2: every student shares for 45-60 seconds while pointing to the timeline.
73-75	Exit: keep one useful phrase and correct one sentence. Collect the two individual products.

Read, model and give feedback

Worker clues are original classroom scripts, not textbook transcripts.

Worker clues: read twice

學生記錄其中兩位的職業、取向及證據。

1. I prepare food for other people. I enjoy cooking and trying new dishes. Enjoying my work is more important to me than making a lot of money.

2. I create computer programs. I like working with a team, but my main priority is making enough money to support myself.

3. I care for people who are ill. I want a job close to home because I like spending time with my family.

4. I design buildings and work with different materials. Being part of a team is the most important thing for me. I enjoy sharing ideas with other people.

Speaker	Job	Priority
1	chef	doing something I enjoy
2	software developer	making money
3	nurse	working close to home
4	architect	being part of a team

Language check and useful matches

接受能用工作內容解釋的多種配對。

Handout p.1: be / communicate / communication.
Handout p.3: had ... met / had ... spoken / helped (had helped would change the intended sequence).
Examples: architect - use imagination + work with materials; nurse - be calm + care for people; reporter - be honest + communicate clearly; accountant - focus on details + check money carefully. These are examples, not exclusive requirements.

What each student shares

先獨立準備，再在組內輪流分享；可抽選少量同學全班示範。

Job report: name the job, explain an action, justify two skills and state a personal work preference. Listen for needs to be + adjective and because.
Life story: five past events; two accurate earlier / later connections; a person, a place and a feeling. Ask the listener to identify which event came first, then improve one sentence.
Scaffolding: students keep the model, verb table and frames visible. Confident students can speak from keywords; others can first rehearse complete sentences.

Vocabulary: U1 qualities / feelings; U2 communication, imagination and places; U5 people and relationships; U9 jobs, teamwork and milestones. Card phrases adapt these words into usable actions. Technical action phrases also draw on the supplied 9A job descriptions. Extra event language supports the task.
Grammar: the earlier event takes past perfect when viewed from a later past point; do not make every event past perfect. With before / after, past simple can be sufficient. Allow real or imagined timelines.
